Malyshkin Fedor

mobile: +7-909-125-9693 (the same for WhatsApp, Viber)
e-mail: fedor.malyshkin@yandex.ru

About myself: As a Software Developer, I'm always looking for application of my experience in product development and process organization. I am tending to take a part in development of products with a lot of data and/or with lots of users.

Objective:
Find a job as a Java/Scala software developer of analysis/processing data.

Education:
Higher learning. In 2003 graduated from Saint-Petersburg State Forest Technical Academy, specialty – engineer, course - "Information systems in the chemical-forestry complex")

Employment History :

from April 2018 to the current time
HFLabs https://hflabs.ru/ (by contract) *(software development)*

Post	Software Developer
Job	• software development.
Responsibility	• adding functionality and bug fixing to banking MDM (master data management) system (something like https://hflabs.ru/uniform-client).

from November 2009 to April 2018
The National Bank of the Republic of Komi *(banking)*

Post	Head of sector
Job	• management of the sector which is responsible for the support of infrastructure systems, user workstations and office equipment (7 people).
Results	• integration/support/upgrade of terminal access system (Citrix) (≈400 users) and virtualization system (VMware and EMC) (≈120 virtual servers) in branch *(role: planning, coordination, communication with management and users, making key architectural and organizational decisions)*; • integration of the incident management process (ITIL process) (organization of service desk, accounting requests, reporting) in the division of information *(role: motivation, bring goals to the participants, coordination, monitoring performance, making key organizational decisions)*; • integration of monitoring system for server hardware in the information and payment segments (based on HP SiteScope) *(role: planning, coordination, making key organizational decisions)*; • integration of disaster recovery process *(role: planning, coordination, development and implementation process in full)*.

from November 2005 to November 2009
Magnetosoft, LLC *(software development)*

Post	Senior Java Software Developer
Job	• software development; • development team management.
Results	• development of document management system for a woodworking enterprise "Mondi Syktyvkar" (≈700 user) *(role: architecture development and control over its implementation, analysis and selection of technologies to use, development of internal documentation)*; • integration of technical and organizational processes within the firm *(role: choosing a development methodology, implementation processes, TDD and CI, time)*;

- implementation and adaptation of continuous integration with usage of the Hudson and creating scripts set for automatic deployment with usage of Ant/Svn/Artifactory.

Professional Skills :
- wide experience in Java programming, practice in Scala, R;
- practical skills in data analysis, machine learning (clustering, classification, linear regression), extracting data from natural language, knowledge of mathematical statistics, usage of data visualization tools;
- practical skills with system configuration management (Puppet), build systems Gradle/Maven/Ant, continuous integration Hudson/Jenkins/TeamCity, version control systems Svn/Git/BitBucket, systems of statistics collection and presentation InfluxDB/Grafana;
- practical skills in Android development;
- experience on agile methodologies (Scrum), extreme programming (XP);
- the ability to read other's code, write tests, make refactoring;
- experience on cluster solutions for data/message processing with usage of Apache Storm, Apache Spark.

Completed Projects (worthy of mention):
- GLR parser to extract structured data from text in natural language;
- news aggregator (client - Android, server side - Java/Groovy, Apache Spark/Storm) (available - https://github.com/fedor-malyshkin/) (development process and architecture are described in the habrahabr.ru blog - the posts series "В разрезе..." (https://habrahabr.ru/post/334510/).

Additional Education and Courses:
- Coursera's «Executive Data Science» specialization;
- Coursera's «Data Science» specialization;
- Various certificates in statistics and data processing from Stepik.org.

Additional Info:
- English - Intermediate;
- from time to time I write in blog on habrahabr.ru (http://fedor_malyshkin.habrahabr.ru).

Personal Skills:
- wide experience (development and maintaince), attention to details, self-learning, analytical mind, ability to see the entire process («in whole»).
